

Air Conditioning & Refrigeration

2 Day Seminar

DESCRIPTION:

The Air Conditioning and Refrigeration seminar utilizes the latest information on equipment, service tools, and refrigerant blends while maintaining a completely noncommercial approach with no brand preference.

Includes EPA Section 608 Refrigerant Technician Examination!

Designed for employees in a variety of positions, this training seminar emphasizes understanding of the compression refrigeration cycle, which is critical information for service technicians, maintenance mechanics and foremen, and those tasked with the selection and supervision of outside contract vendors or in-house employees.

Every on-site seminar addresses only the air conditioning and refrigeration systems in use at that facility. This seminar can be expanded to three days to allow time for hands-on exercises or additional EPA Preparation.

Each student receives:

- 1 Published textbook "Air Conditioning & Refrigeration"
- 2 Course Certificate
- 3 EPA Sect. 608 Exam Materials

Topics covered in detail include:

- Compression refrigeration cycle review
- Thermodynamics review
- Major system components
- Auxiliary components and controls
- Refrigerants - old and new blends including R-410A
- Preventive maintenance procedures
- Troubleshooting and servicing equipment
- Obtaining peak system efficiency
- Changes in the EPA regulations
